

# Design, Manufacturing and Applications of Composites: Proceedings of the Ninth Joint Canada-Japan Workshop on Composites July 30-August 1, 2012, Kyoto, Japan

Covers most up-to-date activities on research and development on Composites in Canada and Japan

----- Based on research papers presented in July 2012 at the Kyoto Institute of Technology, the ninth book in the Canada-Japan Composites Workshop series contains 43 chapters on new ways of fabricating FRP, ceramic, wood, and natural fiber composites and improving their functionality in aerospace, wind energy and civil engineering. Selected subjects covered include: bolted joints, ballistics, recycled matrix materials, pipes, structural health sensing, self-welding, vibration damping, EM shielding, sandwich panels, optical fibers and more. Examples of

**TABLE OF CONTENTS**

Effect of Hot-Press Pressure on Mechanical Properties of Unidirectional Jute Spun Yarn Reinforced PLA1 Hideaki Katogi and Kenichi Takemura, Yoshinobu Shimamura, Keiichiro Tohgo and Tomoyuki Fujii Evaluation of Thin Titanium Films- CFRP Fiber Metal Laminates for Composite Bolted Joints Hayato Nakatani and Shinji Ogihara, Tomoki Yamada and Yuhei Nekoshima Debonding Behavior Characterization of Fiber Matrix Interface Using a Cruciform Model Composite with Multiple Fibers Shota Kobayashi, Hayato Nakatani and Shinji Ogihara Evaluation of Fiber/Matrix Interfacial Debonding Behavior Using a Partially Embedded Single Fiber Shin Iwata, Hayato Nakatani and Shinji Ogihara Ballistic Performance Prediction of Three-Layered Thermoplastic Laminates S. Sasaki and H. Kasano Temperature Effect on Delamination Detection Method in CFRP Laminates Using Mode Conversions of Lamb Waves Yoji Okabe, Yuho Gorai, Shinji Ogihara and Hideki Soejima Processing and Testing of Basalt/Wood Fibre Reinforced Recycled Plastic Composite Materials Stephen Lee, Leo
