

Design, Manufacturing and Applications of Composites: Proceedings of the Ninth Joint Canada-Japan Workshop on Composites July 30-August 1, 2012, Kyoto, Japan

Covers most up-to-date activities on research and development on Composites in Canada and Japan

----- Based on research papers presented in July 2012 at the Kyoto Institute of Technology, the ninth book in the Canada-Japan Composites Workshop series contains 43 chapters on new ways of fabricating FRP, ceramic, wood, and natural fiber composites and improving their functionality in aerospace, wind energy and civil engineering. Selected subjects covered include: bolted joints, ballistics, recycled matrix materials, pipes, structural health sensing, self-welding, vibration damping, EM shielding, sandwich panels, optical fibers and more. Examples of
