peter.spencer-phillips@uwe.ac.uk It is a
very great privilege to write the preface to
the first specialist book on downy mildews
since the major work edited by D. M.
Spencer in 1981. The idea for the present
publication arose from the Downy Mildew
Workshop at the International Congress of
Plant Pathology (ICPP) held in Edinburgh
in August 1998. Our intention was to invite
reviews on selected aspects of downy
mildew biology from international
authorities, and link these to a series of
related short contributions reporting new
data. No attempt has been made to cover
the breadth of downy mildew research, but
we hope that further topics will be included
in future volumes, so that this becomes the
first of a series following the five year
ICPP cycle.
