

Corrected by the Doctor: Victorian First Time Exhibitionist Medical

Its a technique used to combat deviant behaviour in female prisoners. It should be ideal here. When Violet discovers shes been seen pleasuring herself shes mortified and expects to be instantly dismissed from her job. Instead she finds herself taken to Dr. Howells training establishment where the doctor is keen to correct her exhibitionist behaviour. An unusual vegetable punishment and a session with a paddle are only the start of her humiliation.

Violet quickly discovers the pleasure shed always given herself is nothing compared to the pleasure of a first time experience from two men eager to show her the error of her ways. Just how much correction will she need before she can return to her employer?
