

# Windows PowerShell: In a Month of Lunches

Want to learn Windows PowerShell, but afraid of the learning curve and ramp-up time for become a scripter? No worries: PowerShell is often misrepresented as a scripting language, when in fact its more a very powerful command-line environment similar to the Cmd.exe command-line youve probably used for years. Whether youre administering Windows Server, Exchange Server, SharePoint Server, SQL Server, System Center, or any other PowerShelled product, you can be immediately effective without having to learn a programming language. Windows PowerShell guru Don Jones one of the worlds most-published PowerShell author has taught more than 10,000 administrators to use PowerShell, and now hell teach you. Just set aside one hour a day lunchtime would be perfect for an entire month, and youll be automating administrative tasks faster than you ever thought possible. Don combines his own in-the-trenches experience with more than five years of PowerShell instruction to deliver the most important, effective, and engaging elements of PowerShell to you quickly and painlessly, setting you on the path to a career-boosting future.

**What youll learn** Discover the PowerShell language in practical, easy-to-understand installments

Understand the pipeline, formatting, objects, variables, and debugging Work with one of the best PowerShell experts, and digest concrete lessons in carefully measured increments designed to minimize the amount of time youll need to become a Powershell Master Choose to stay only with the lesson, or enjoy more in-depth learning with the numerous expanded sections and background information

**Who this book is for** Administrators of all Microsoft server products, including Windows Server, Exchange Server, SharePoint Server, SQL Server, System Center, or any other PowerShelled product:

this book can help you become more efficient and productive.
