Why spend hours scouring the internet for instructions on how to remove that virus that somehow made it past your anti-malware tools? And then, hoping that: the instructions work the process doesn't do even more damage the results don't leave your machine just as infected as before. You'll remove malware the easy way instead: restore your machine to the state it was in before it was infected and you're done! The malware is gone. Backing Up - The Closest Thing to a Silver Bullet Having a proper and recent backup can save you from just about anything. In fact, there's very little that a good backup can't rescue you from. Malware infection? Restore from a backup and it's gone. Bad software update? Restore from a backup and it's removed. Need that file you deleted last week? Restore it from a backup. I could go on singing the praises of backups - but hopefully by now you get the idea. You should backup. So why aren't you? Saved! Backing Up With EaseUS Todo will help you get started.
