

Tactical Radio Operations Field Manual 6-02.53: 2009

This field manual (FM) serves as a reference document for tactical radio systems. It also provides doctrinal procedures and guidance for using tactical radios on the modern battlefield. This FM targets operators, supervisors, and planners, providing a common reference for tactical radios. It provides a basic guidance and gives the system planner the necessary steps for network planning, interoperability considerations, and equipment capabilities. This Field Manual also provides many pages covering antenna basics, radio wave propagation, antenna repair which is useful for amateur radio operators. This book will also provide the amateur radio operator with better radio operating techniques that the military uses for successful communications.
