

Taken by the Doctor: Three Victorian Stories: Historical Medical First Time

Three complete stories of Victorian virgins getting their first medical exams...and more! Chained by the Doctor (and Used by the Crew) Barmaid Trixie Allen has a guilty secret: she longs to be taken by several men at once and she hatches a plan to make her fantasy a reality. But when Dr. George walks in on what he thinks is an assault, he ruins Trixie's dream evening. Horrified by her confessed urges, the good doctor sets out to cure Trixie by giving her too much of what she craves--turning her over to the ship's crew. But can too much ever be enough? The Doctor's First Mate Kit Marsters, fourteen-year-old cook's boy, is really Katherine Marsters, a grown woman trying to make enough money aboard ship to support her siblings back home. She's kept her head down and her womanly form bound tightly, deflecting attention so that she can keep a job that brings in more money than she'd make as a shop girl or maid. When she's injured in a skirmish at sea, Dr. George discovers her secret. To keep his silence, Kit agrees to help the doctor teach his handsome new apprentice about the anatomy of a woman...and how to use it. Sweet Cicely's First Exam Cicely doesn't want the doctor to come to the isolated lighthouse island where she grew up. Her mother says it's time she learned what it means to be a woman and that Dr. George is just the man to teach her. But Cicely wants to keep living like a little girl, even as age and her womanly body begin to betray her. It takes three grown men--one the second man her mother married--to convince her that some of a woman's duties are not to be dreaded at all.

Australian practitioners quickly took up advances in practice from the first female student was admitted to medicine in Sydney in 1885. medicine its colonial history is discussed elsewhere.^{1,2,3} Nor do I (1789-1868), a Sydney emancipist doctor, became the first full-time private practitioner in 1815.
